**InsuranceSuite**

# PolicyCenter

Streamline policy management with automation and tailored solutions

## Seasonal Coverage

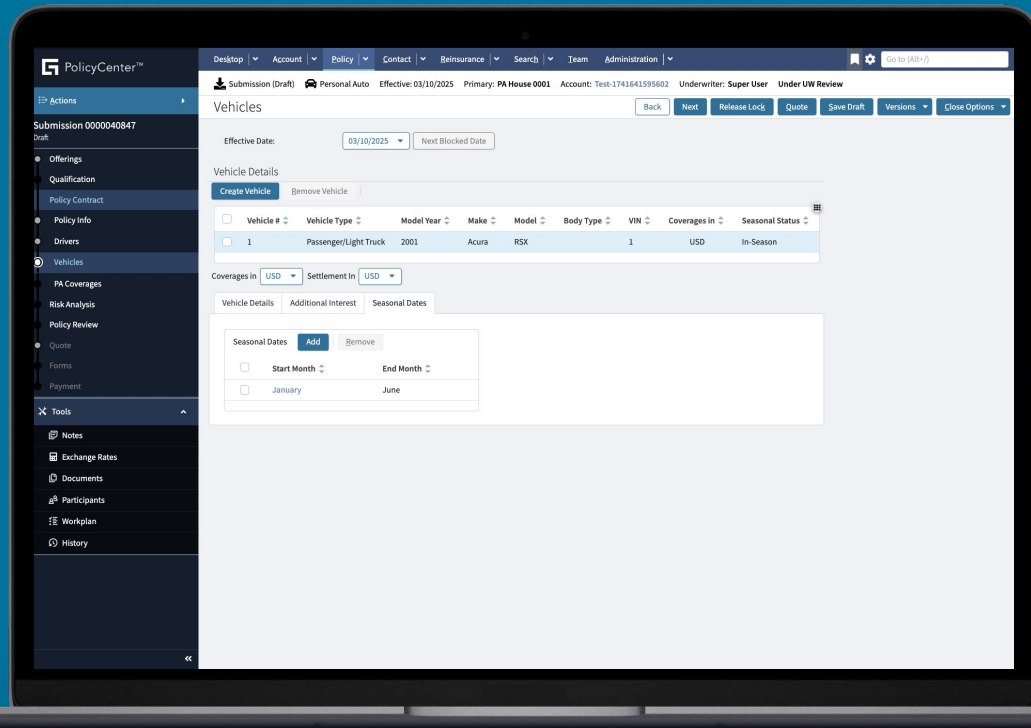

Tailor insurance solutions to meet policyholder needs by activating certain coverages during high-risk periods and suspending them during off-seasons.

## Policy Data Purge

Customers can now delete older terms on active policies, optimizing storage while remaining GDPR compliant.

## Autopilot Workflow Service Reference Implementation

Speed up development with a reference guide for personal auto policy submission.

# BillingCenter

Enhance customer experience with streamlined billing and payment processes

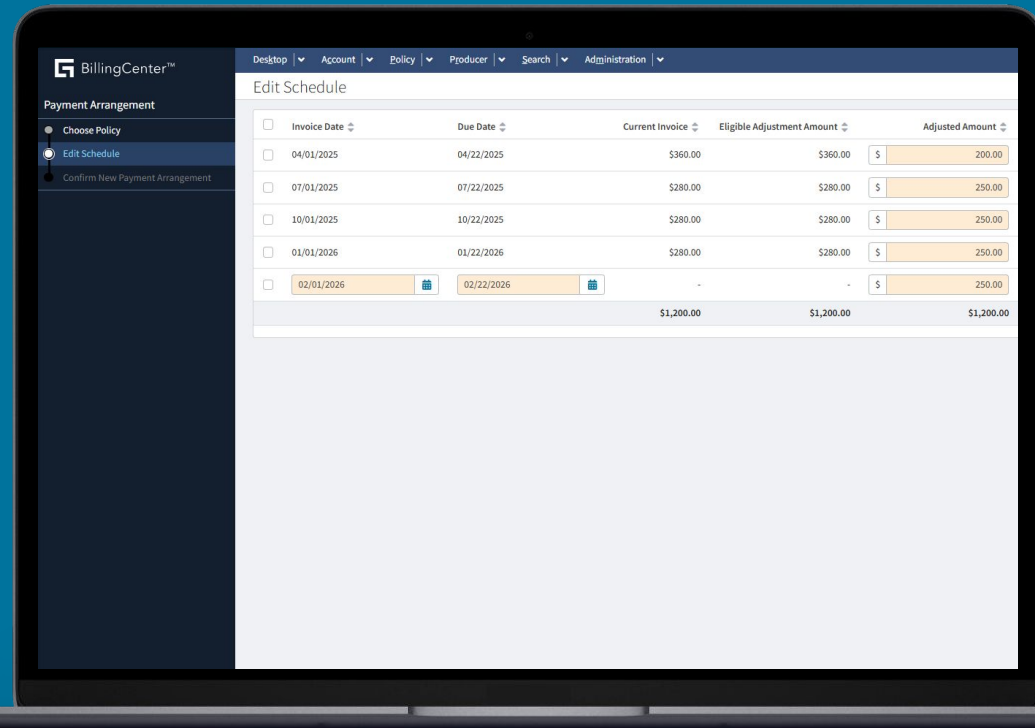

## Claims Payment and Recovery on Account

Improve customer experience and reduce costs with an integration to receive claim payment and deductible recovery instructions directly from ClaimCenter or another claims system.

## Flexible Invoicing and Payment Arrangements

Enhance billing flexibility and operational efficiency with a simplified process for modifying invoice items and schedules.

# ClaimCenter

Easier development and improved claims experiences

## Claims Payment and Recovery on Account

Streamline claim settlement and reduce costs by sending instructions to credit payment or recover deductible via the regular premium collection process.

## Average Weekly Wage Calculator (Early Access)

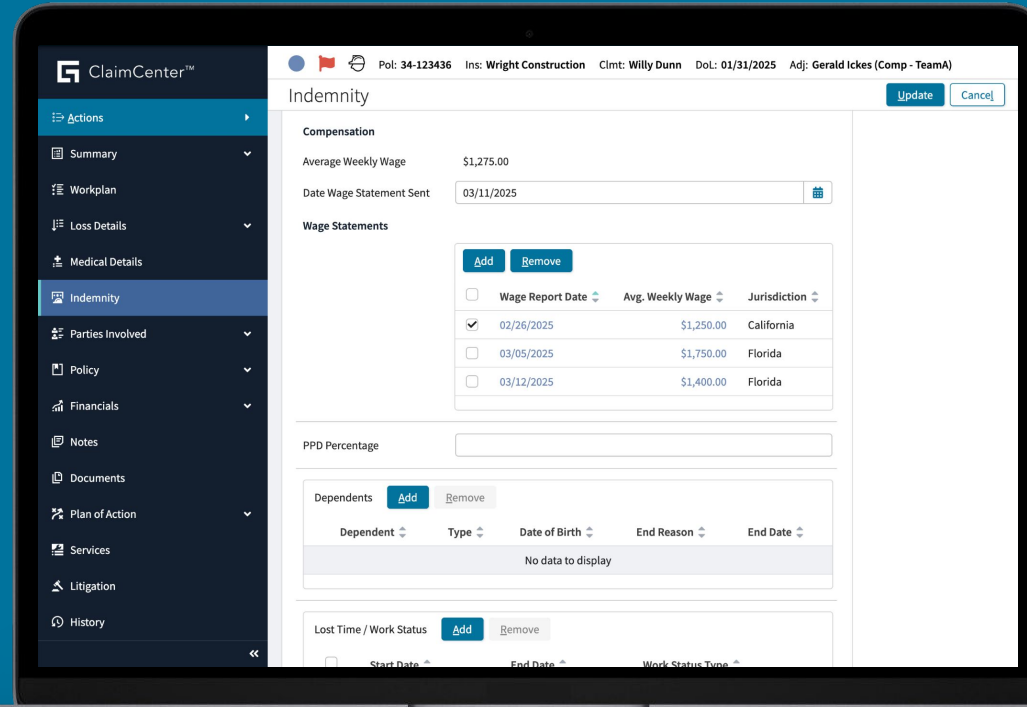

Calculate an injured worker's average weekly earnings to serve as the basis for determining benefits in accordance with jurisdiction-specific requirements.

## Autopilot Template for Personal Auto Glass Claims

Enable end-to-end glass claim processing with a pre-built Autopilot template for Personal Auto Glass, available through Guidewire Marketplace.

## Experience Template for Commercial Auto FNOL

More quickly deploy a Jutro First Notice of Loss experience for commercial auto customers.

**InsuranceNow**

# InsuranceNow

Streamline critical workflows with automation and integrations

## ISO Rating as a Service (RaaS) for CPP Property

Access the complete rating for CPP Property with the latest rates and coverages direct from ISO.

## Mid Term Producer Change Enhancements

Easily update the producer in batches for multiple policies without having to wait for renewals.

## One Inc. Integration for Premium Refunds

Improve the way premium refunds are processed by directly refunding them through One Inc.

## Hi Marley Integration Enhancements

Enhance adjuster workflows by alerting adjusters of negative sentiments, reopening of cases, and additional attachments in the case

The screenshot displays the GUIDEWIRE InsuranceNow interface. At the top, there is a navigation bar with 'Home', 'Quote/Policy', 'Billing', and 'Claims'. Below this is a search bar and a breadcrumb trail: 'ADVANCED SEARCH: POLICY CLAIMS'. A left-hand navigation menu lists various policy-related actions: Policy, Underwriting, Dwelling, Coverages, Review, Loss History, Additional Interests, Forms, Commission, Premium Info, Worksheets, Reinsurance, Inspections, and Special Options. The main content area is titled 'Transaction Selection' and shows a 'Producer Change' form. The form includes fields for 'Start Transaction\*' (set to '11/12/2024'), 'Effective Date\*', 'Producer' (set to 'ABC - ABC Producer'), 'New Producer\*', 'New Sub Producer', 'Description\*', and 'Additional Declaration Text'. There are 'Start' and 'Cancel' buttons at the bottom of the form. Below the form is a 'Transaction History' section with a 'Show All' checkbox and an 'Export Policy' button. A table below shows a single transaction:

Term-Seq Number	Transaction	Description	Effective
1:1	New Business	Rewrite - New Business	06/19/2024

# Analytics

# Predict

Empower your analytics team with streamlined modeling and new data pipelines

## AutoML: Hyperparameter Tuning

Streamline the model-building process by automating the process of finding the best set of hyperparameters for a ML model to optimize performance.

## Model-Ready Datasets

Leverage model-ready datasets from Data Studio with Predict to seamlessly solve the first-mile problem.

## Analytics Manager: Advanced Expression Editor

Benefit from intelligent code assistance that ensures best practices and performance standards are met, leading to more reliable solutions.

The screenshot displays the Predict web interface for configuring XGBoost hyperparameters. The interface includes a navigation bar with 'Home', 'Build', 'Deploy', and 'Monitor' options. Below the navigation bar, there are tabs for 'Configuration', 'Reports', 'Export Scores', 'Double Lift', 'Cross Grid', and 'Batch Inference'. A notification banner prompts the user to review hyperparameters. The main content area shows the 'Hyperparameter - XGBoost' configuration page, which is divided into several sections: 'Data View', 'Description (Optional)', and 'Hyperparameter - XGBoost'. The 'Hyperparameter - XGBoost' section contains a table of hyperparameters and their values, along with a sidebar for 'Objective Options' and 'Analysis Objective'.

Hyperparameters	Your Value	Default Value
Problem Type	Frequency	Frequency
Evaluation Metric	rmse	rmse
Verbosity	1	1
Early Stopping Rounds	-1	-1
Number of Boosting Rounds	10-20	100
Maximum Depth	2,5,7,10,20	6
Learning Rate	0.3	0.3
Objective Options	count:poisson	count:poisson
Minimum Child Weight	1	1
Gamma	0	0
Subsample	1	1
Colsample By Tree	1	1
Regularization Alpha	0	0
Regularization Lambda	1	1
Scale Pos Weight	1	1
Training	0.7	0.7
Sampling Method	Portion	Portion
Enable K-fold Cross-validation	No	No

# Cyence

Get deeper and more granular insights into cyber risk

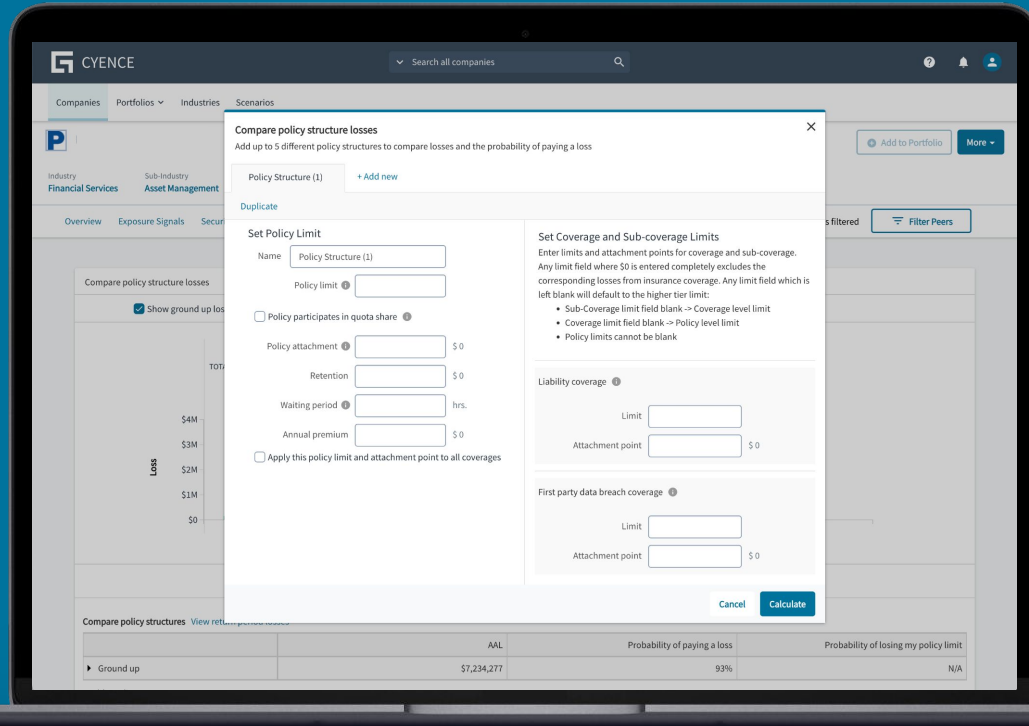

## New Financial Model 7.1

Updated model allows users to set limits on exclusions and subcoverages, proving more granular control over policy terms.

## Industry Loss Curve

Get insight into US cyber industry premiums and insured losses. Examine detail on catastrophic cyber events at key return periods, which can expose companies and insurers to material disruption.

**Platform**

# Jutro Digital Platform

Streamline development of digital experiences to accelerate speed to market

## New Digital SDK UI Extensions

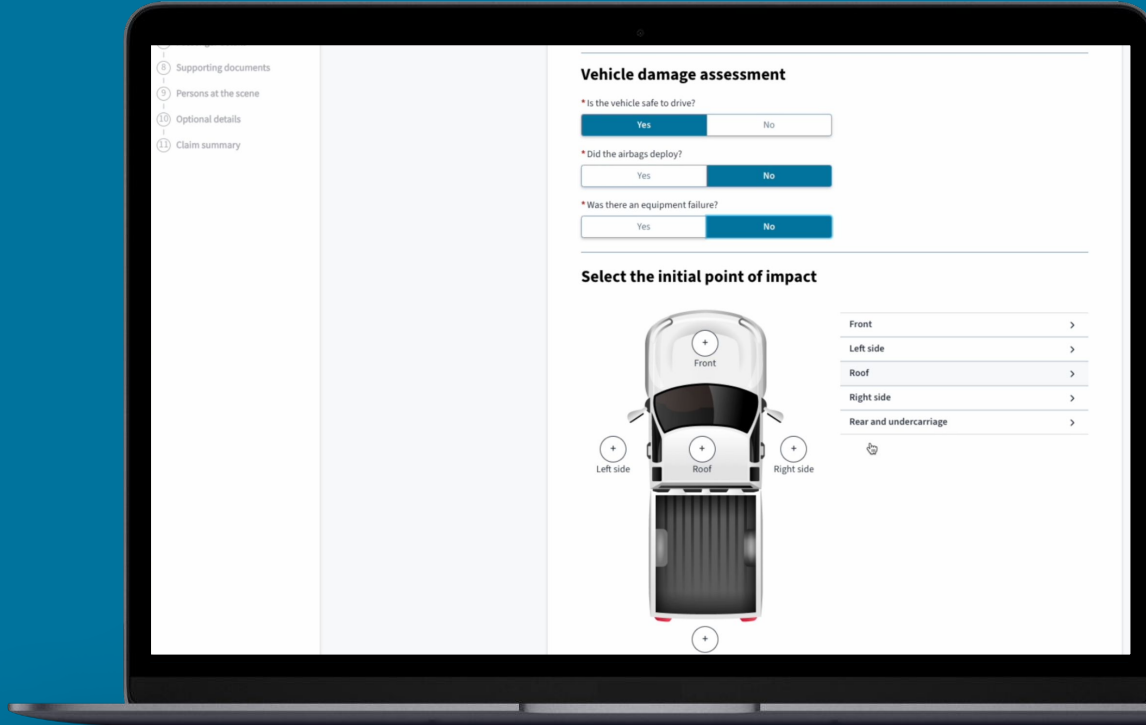

Streamline insurance web application development. Data Hooks automatically connect your InsuranceSuite data and unique product rules to the UI, cutting coding time and improving speed to market.

## New Experience Templates

Accelerate the launch of new digital experiences to drive innovation and improve customer engagement. 'Workers' Compensation Quote & Buy' and 'Commercial Auto FNOL' templates included with Jutro subscription.

## Enhancements to Pre-existing Templates

Deliver best-in-class, personalized digital experiences faster, improving both the agent and policyholder experience.

# Guidewire Cloud Platform

Optimize user experience and accelerate resource management with enhanced control and insights

## Real User Monitoring\*

Proactive identification and resolution of performance bottlenecks and user experience issues.

## Self-Service Non-Production Planets\*

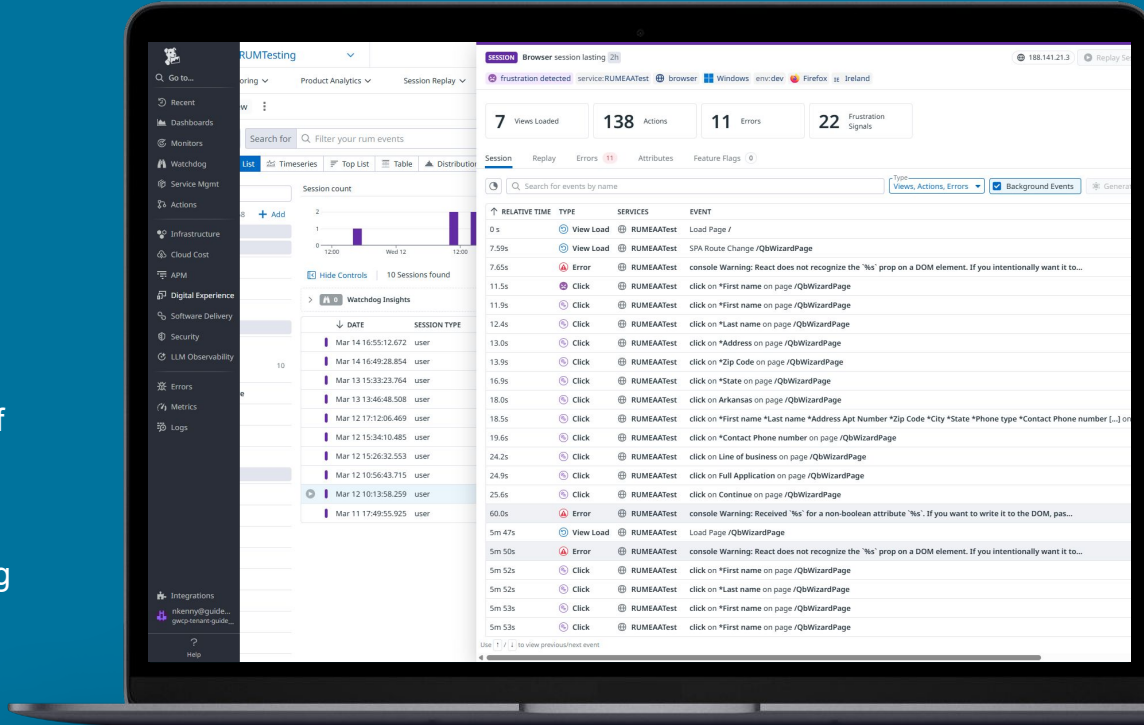

Streamline resource management and greater control over your Guidewire applications setup.

## Self-Service PrivateLink Egress\*

Protect data leakage and enable private access of in-network resources.

## Autopilot Workflow Service for PolicyCenter

Maximize efficiency by leveraging low-code tooling to manage job assignments and automate key processes.

# Guidewire Data Platform

Empower predictive insights, improved data management, and better data streaming experience

## Data Studio Integration for Predict

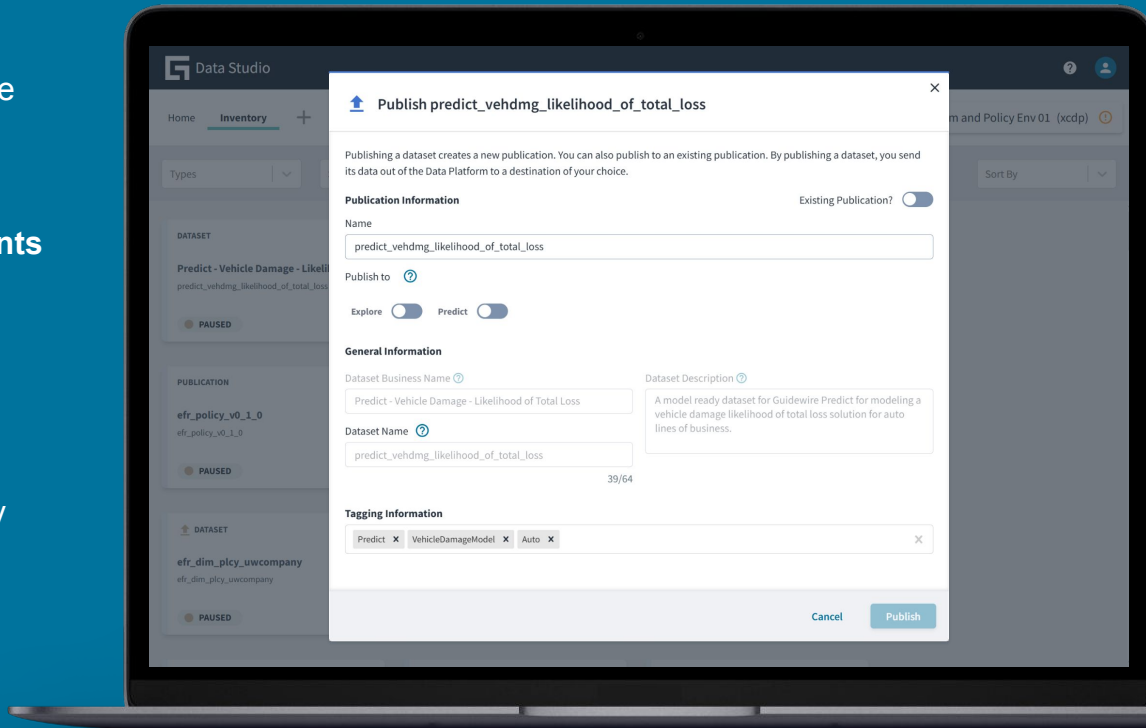

New model-ready datasets to seamlessly solve the first-mile problem to embed analytics and provide business predictions at the point of decision.

## Data Studio Content Management Enhancements

Enhanced control and content management with expanded dataset lineage as well as the ability to retire and delete published datasets.

## Self-Service Cloud Data Access (CDA) for Non-Production Planets\*

Faster resource management and greater visibility over your data streaming.
