Embrace DEI and support gender inclusivity

Gender Identity Fields for PolicyCenter, BillingCenter, and ClaimCenter

Made for: DEI Officers, Developers

Ensure that all people feel acknowledged and respected by properly capturing gender and preferred pronouns, including a new gender option for “non-binary” and both pre-filled and self-defined pronoun options.

Enable developers to more easily build advanced inclusivity options with a data model that supports the addition of a Sex Assigned at Birth (SAAB) field.

Simplify regulatory compliance in local jurisdictions where gender identity must be recorded to protect against discrimination.

Integrate with other Guidewire products and custom frontends

New InsuranceSuite APIs

Made for: Developers and System Admins

PolicyCenter

Leverage the Guidewire product ecosystem with new API endpoints to link contact primary address with account address, view history events, and manage line of business questions. Support new APD features with codegen APIs.

Made for: Developers and System Admins

BillingCenter

Improve acountholder and agent experiences with new APIs that facilitate digital front-ends for account holders to view and change account information, build integrations with Document Management systems, and provide agents detailed billing breakdowns.

Made for: Developers and System Admins

ClaimCenter

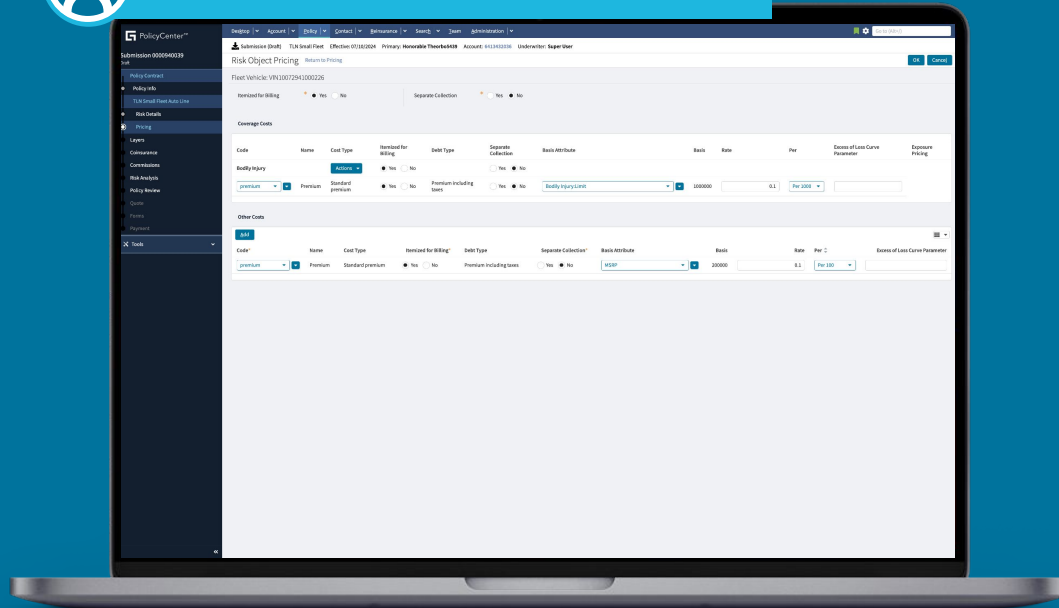

Enhance claims functionality with new APIs to retrieve information from external Policy Administration Systems (PAS) and to expose aggregate claim financials.

Provide commercial lines flexibility and customization

Manual Pricing and Business Rule Overrides

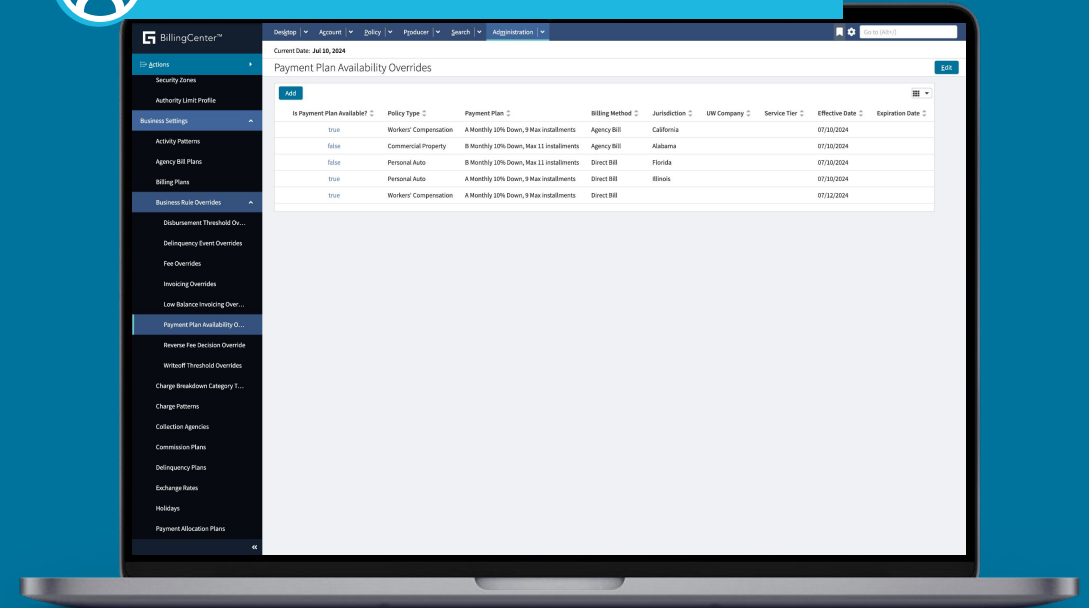

Made for: Underwriters

Adjust pricing to align with your risk strategy by enabling commercial lines underwriters to manually add rates and premiums, creating custom pricing to align with their tolerance for larger risks.

Made for: Billing Specialists, System Administrators

Provide flexibility in managing BillingCenter rules and plan configurations with the ability to override business logic based upon certain criteria, such as jurisdiction, line of business, etc.

PolicyCenter

Streamline your submission lifecycle

Intelligent Updates to Submission Intake

Made for: Underwriters, Intake Coordinators

Import building and location data with Schedule Import, which now supports Statement of Values, allowing Intake Coordinators and agents to seamlessly upload data using a dynamic import wizard that automatically maps data to the appropriate fields in PolicyCenter.

Reduce manual data formatting with intelligent updates to Submission Intake including smart column matching, auto-select for worksheets, and a bulk option for deleting rows.

Easily enable your underwriting team by using PolicyCenter as the source of truth for product definitions and removing dependency on Advanced Product Designer.

BillingCenter

Seamlessly migrate billing data from legacy systems

Billing Migration Tool

Modernize your billing experience by moving to a cloud-based platform that allows you to offer policyholders and agents convenient, digital payment methods.

Easily define migration order to replicate legacy system behavior and ensure a smooth transition.

Transition a large scope of billing data that includes Billing Instructions, Payments, Disbursements, Commissions, Write-offs, and Agency Bill support.

Made for: Billing Specialists, System Administrators

The screenshot displays the BillingCenter interface. The top navigation bar includes 'BillingCenter', 'Account', 'Policy', 'Producer', 'Search', and 'Administration'. The main content area is titled 'Charges' and shows a table with columns: Reverse, Edit Holds, Override Commission, Date, Account, Payer, Charge Type, Section Type, Billing Instruction, Charge Group, Hold Status, Amount, Commissionable Amount, Primary Producer, Commission, Leader's Fee, Coinsurance Role, Secondary Commission, and Referrer Commission. Below this is an 'Invoice Items' section with a 'Charge Breakdown' table. The 'Invoice Items' table has columns: Installment #, Placement Date, Invoice Bill Date, Invoice Due Date, Owner, Payer, Billing Instruction, Type, Amount, Paid Amount, and Invoice Stream.

Reverse	Edit Holds	Override Commission	Date	Account	Payer	Charge Type	Section Type	Billing Instruction	Charge Group	Hold Status	Amount	Commissionable Amount	Primary Producer	Commission	Leader's Fee	Coinsurance Role	Secondary Commission	Referrer Commission

ClaimCenter

Streamline development of new automation workflows

Autopilot Workflow Service Sub-flows

Simplify the development of automated workflows with building blocks to support more common workflow actions.

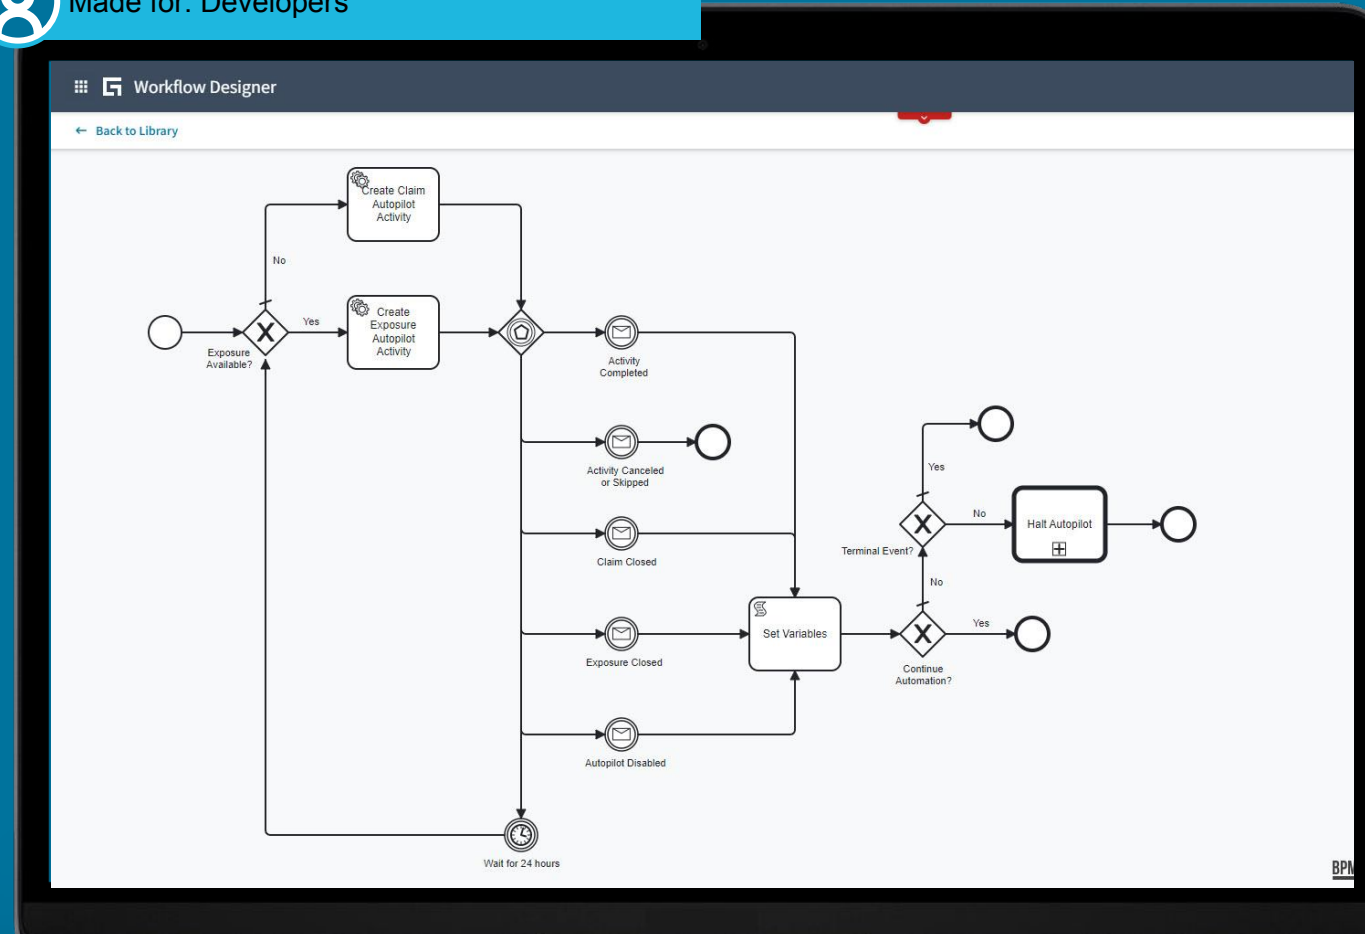

Get started quickly by downloading Sub-flows directly from the Guidewire Documentation site.

Kufri Sub-flows include:

- Check for Exposures
- Activate Autopilot
- Pause Autopilot
- Halt Autopilot
- Create Service Request
- Pay Invoice
- Close Claim

Made for: Developers

Provide more transparency throughout the claim lifecycle

Claims Visibility Enhancements

Keep claimants informed using a new “External Next Step” field that can be configured by insurers based on their existing processes and automated workflows.

Provide transparency to claimants by delivering next step information through customer portals via user role-driven APIs.

Simplify frontend development with an updated Jutro reference implementation supporting delivery of both current status and next step in the claim process.

Made for: UX Developers and Designers

The screenshot displays a user interface for a policyholder's claim experience. The main content area shows details for an "Auto claim #907-555-0101" (2018 Ford Focus). The claim status is "Open".

Type	Loss location	Date of loss
Collision	California	01/01/2023

Quickly identify high-risk claims

High-Risk Claim Prediction Indicator

Highlight potential claim risks for adjusters with a new “High-Risk Predictions” indicator to complement existing High-Risk Indicators for claims that may require increased attention.

Easily view a summary within a new “Predictions” section of the High-Risk Indicators area of the claim status view.

Seamlessly display predictive statuses from any predictive model through Analytics Manager.

Made for: Claims Adjusters

The screenshot displays the ClaimCenter interface for a specific claim. The main view shows a summary of the claim, including a progress bar for 'Open' status (15% complete, 3 days remaining towards a 10-day target), financials (Gross Incurred: \$3,000.00, Paid: \$0.00, Recovered: \$0.00), and loss details (Loss Date: 07/02/2024 12:01 AM, Loss Location: 1253 Paloma Ave, Floor 0000, Developer Unit Habitation Cube #0000, Arcadia, CA 91007). Below the summary, there are sections for Exposures, Services, Planned Activities, and Litigation. A circular overlay on the right side of the screen highlights a 'Status view' section, which includes 'Subrogation' and 'Predictions' information.

Subrogation	Subrogation Status
Exp Segmentation Day 0 - Exposure #1	Warning
Claim Segmentation Day 0	High

Status view

Support the transition from ICD-9 to ICD-10

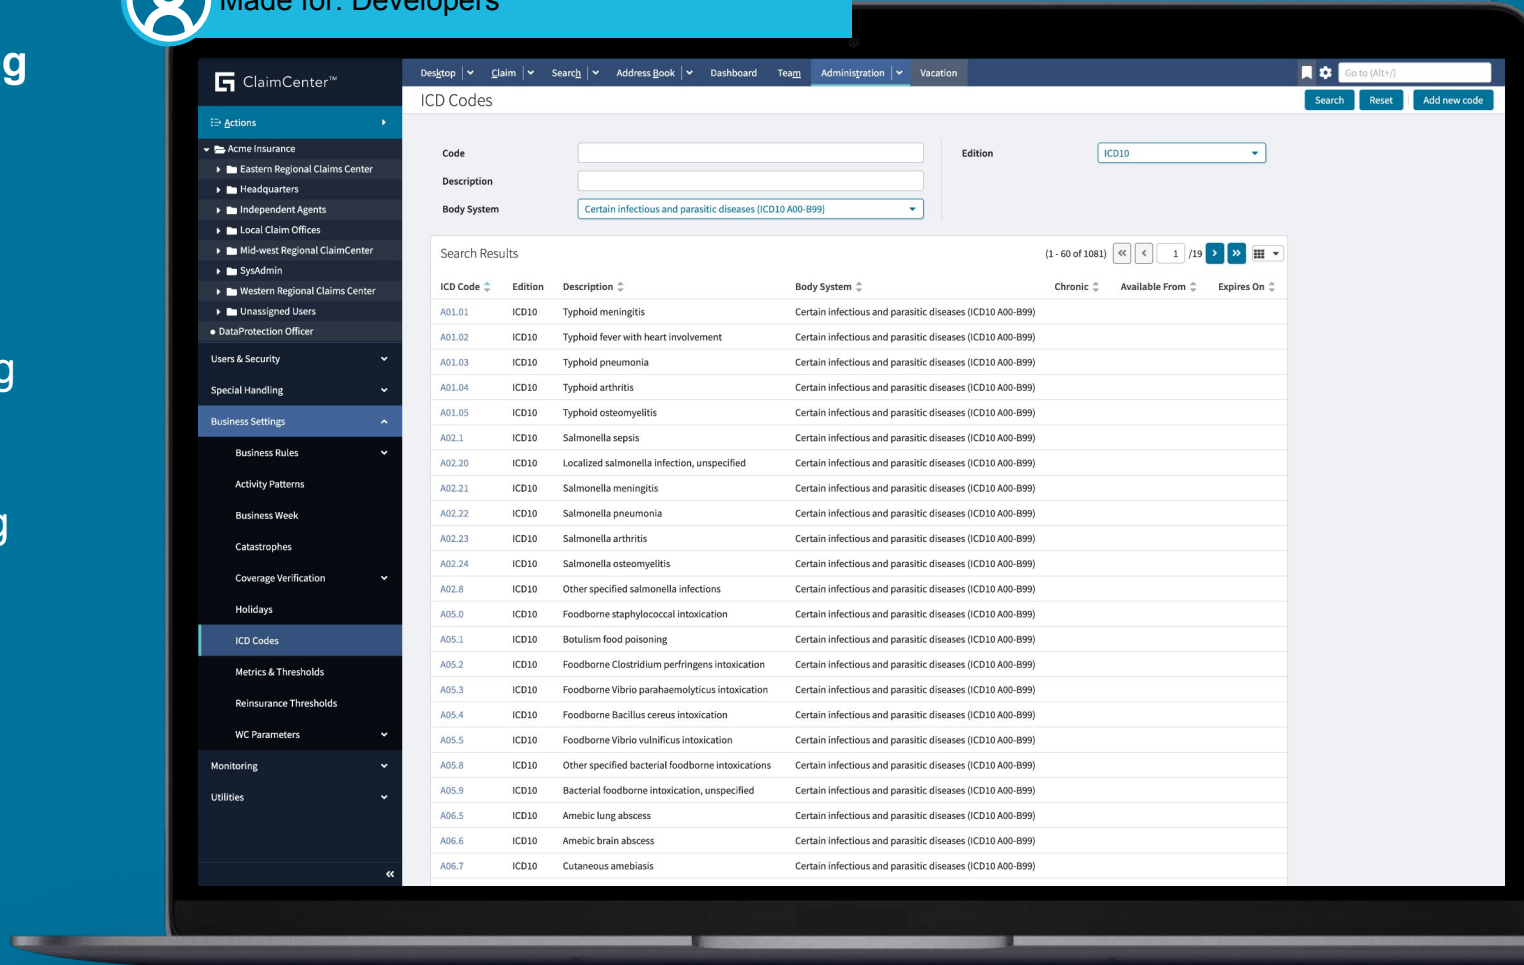

ICD Code Updates in ClaimCenter

Enable accurate injury-related claim processing with the most up-to-date version of ICD-10 codes available out of the box.

Protect and validate claim data by defining the effective-dated window for each version of ICD codes and preventing different versions from being used on a single claim.

Facilitate regulatory compliance by transitioning from ICD-9 to ICD-10 codes as required by Workers' Compensation reporting bureaus, and better preparing yourself for ICD-11 adoption.

 Made for: Developers

InsuranceNow

Launch a new line of business up to 50% faster

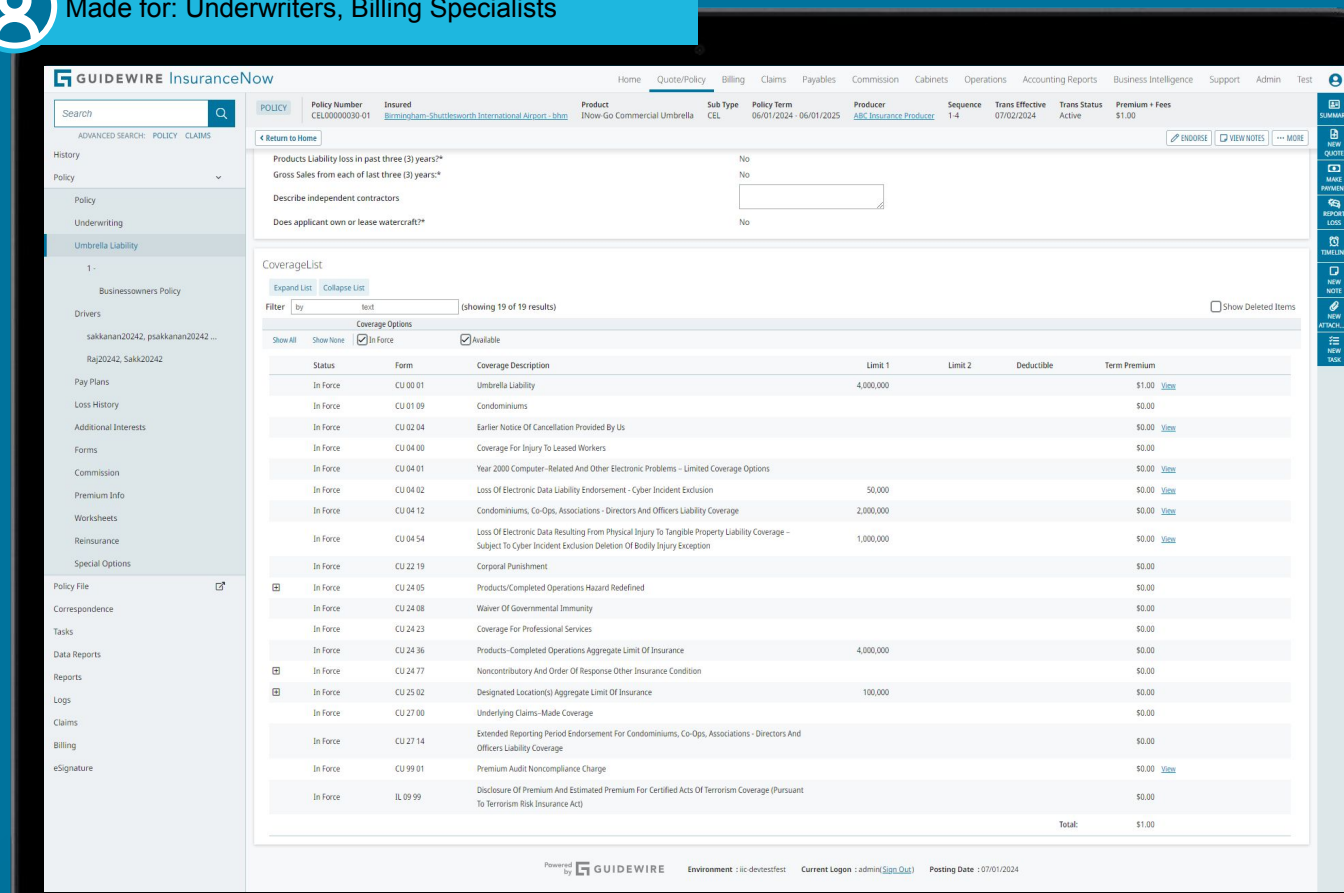

InsuranceNow Go for Commercial Umbrella

 Made for: Underwriters, Billing Specialists

Accelerate go-live with a prepackaged, ISO-based Commercial Umbrella product.

Achieve faster time-to-value with an out-of-the box solution requiring minimal configuration.

Expand into new markets quickly with less requirements gathering, reduced development and testing, and limited involvement from subject matter experts.

The screenshot displays the InsuranceNow web application interface. At the top, there is a navigation bar with various menu items like Home, Quote/Policy, Billing, Claims, Payables, Commission, Cabinets, Operations, Accounting Reports, Business Intelligence, Support, Admin, and Test. Below this, a search bar and a 'POLICY' header are visible. The main content area shows policy details for 'Inow Go Commercial Umbrella' with fields for 'Products Liability loss in past three (3) years?*', 'Gross Sales from each of last three (3) years?*', 'Describe independent contractors', and 'Does applicant own or lease watercraft?'. A 'CoverageList' section is also present, featuring a table of coverage options with columns for Status, Form, Coverage Description, Limit 1, Limit 2, Deductible, and Term Premium. The table lists various coverages such as 'Umbrella Liability', 'Condominiums', and 'Earlier Notice Of Cancellation Provided By Us'. A sidebar on the left contains a navigation menu with categories like History, Policy, Underwriting, Umbrella Liability, Drivers, Pay Plans, Loss History, Additional Interests, Forms, Commission, Premium Info, Worksheets, Reinsurance, Special Options, Policy File, Correspondence, Tasks, Data Reports, Reports, Logs, Claims, Billing, and eSignature.

Status	Form	Coverage Description	Limit 1	Limit 2	Deductible	Term Premium

Analytics

HazardHub

Understand property risk and underwrite faster

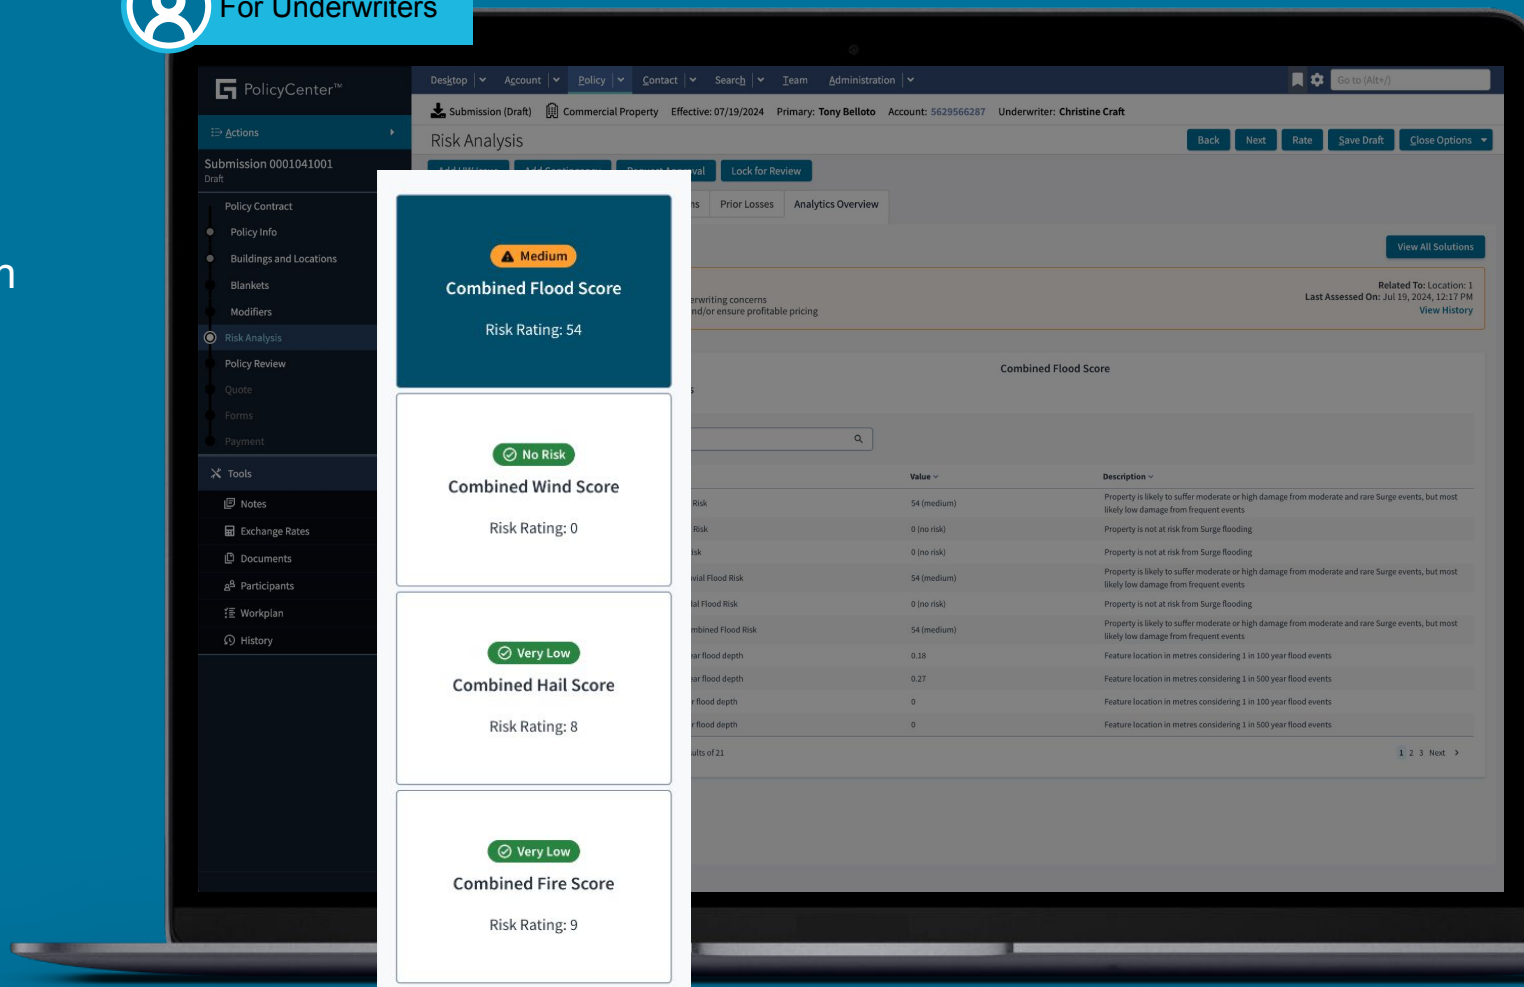

HazardHub Global Expansion

 For Underwriters

Make informed underwriting decisions with scores for 4 risk perils and 65 new data elements per property.

Assess properties globally with data coverage in 19 countries across Europe, Africa, and Asia.

Accelerate workflows with data and scores embedded directly into PolicyCenter.

Glean property risks easily in a visual report

HazardHub Web Reports

Make decisions faster with property risk insights displayed in a visually-intuitive, web-accessible report. No integrations to core systems are needed!

Understand property risks fully by retrieving property characteristics, replacement costs, permit data, and peril risk scores for every address.

Easily download and share insights by downloading and sharing PDF reports with internal stakeholders and external customers.

The screenshot displays the HazardHub web interface for a property at 970 Park Pl, San Mateo, CA, 94403. The report is categorized as 'High' risk, with an observation: 'More than three high-risk factors with grade of D or F detected'. The last assessment was on Jul 19, 2024, at 1:16 PM. The interface includes a navigation menu with 'Risks', 'Enhanced Property', 'Replacement Costs', 'Permits', and 'Report'. A table provides property details such as location, use code, number of fire stations within 5 and 10 miles, year built, and property elevation. A map shows the property location with coordinates 37°32'38.9"N 122°17'35.7"W. A 'Property Risk Assessment' section highlights 'High' risk factors and overall cost estimate. A table lists specific risks:

Status	Risk Gr...	Risk Name	Risk Description
High	D	Wind Region	Strong seasonal wind risks: El Diablo Katabatic Special Wind Region
High	D	Earthquake	Heavy Damage
High	F	Enhanced Hazardhub Flood	Very High risk of flood damage

Cyence

Get the latest, up-to-date view of cyber risk

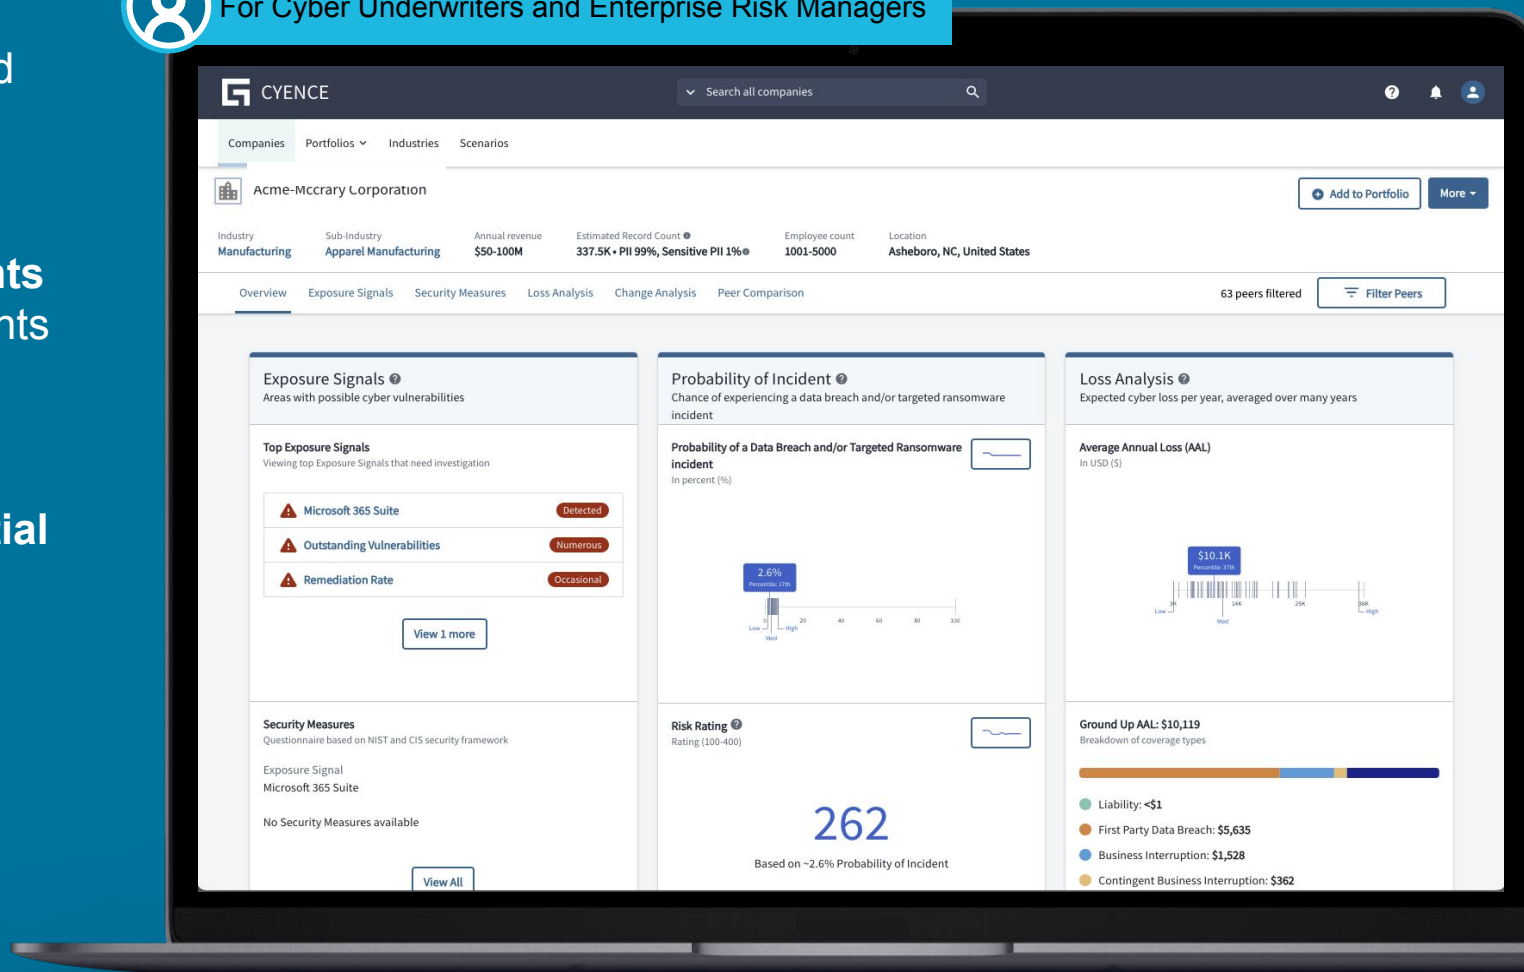

Cyence Cyber Risk Model 7

Assess cyber risk more accurately with updated risk models reflecting the latest threats, trends, incidents, and claims data.

Manage war exclusion and system failure events with flexible options to include or exclude war events and system failure events in your modeling and export files for further custom analysis.

Gain additional insight into data breach potential with an enhanced mass ransomware event model that accounts for data breach activity.

 For Cyber Underwriters and Enterprise Risk Managers

Predict

Gain insights into commercial levers

Business Impact Monitoring

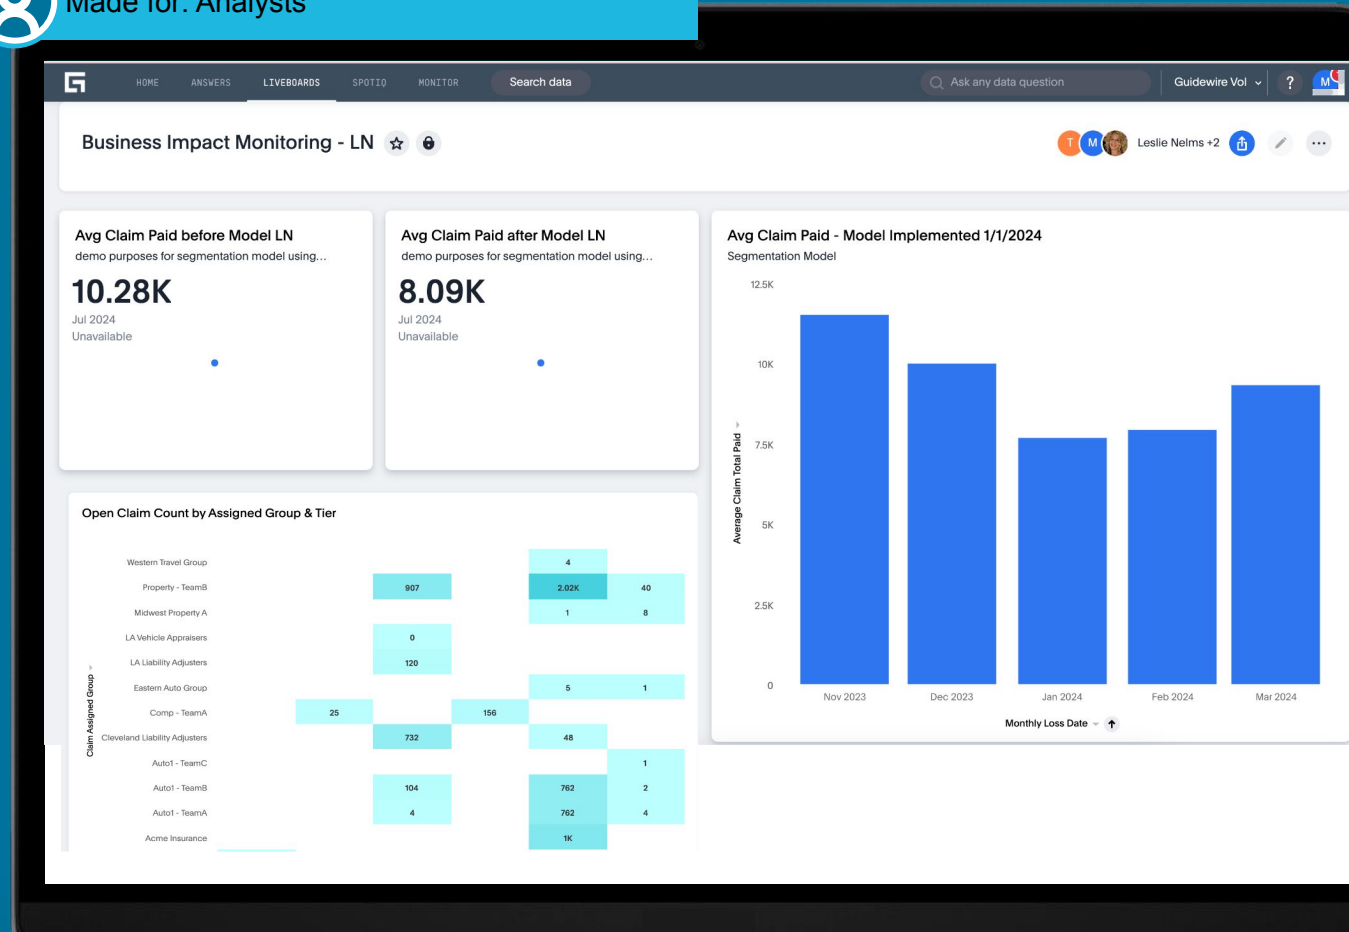

Gain near real-time visibility into how predictive models are affecting claims and underwriting KPIs.

Visualize commercial impact to the bottom line with pre-built dashboards in Explore.

Quantify the true value of your models and prove out the ROI of your analytics initiatives.

Made for: Analysts

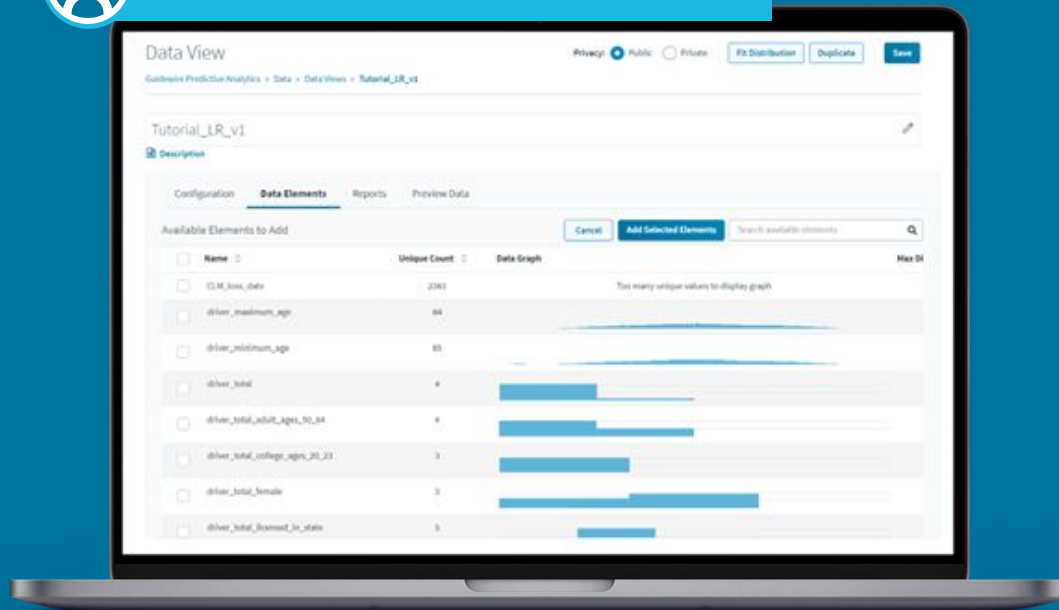

Build models faster with a streamlined process

Usability Improvements and Analytics Manager Enhancements

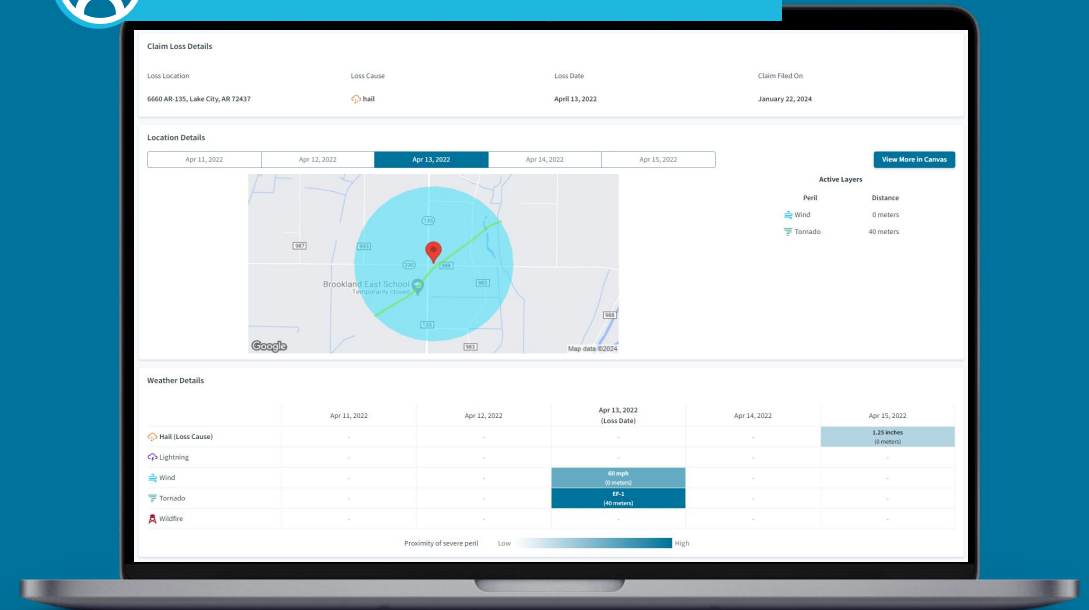

Made for: Analysts, Data Scientists

Bring models to market faster and easier with a refreshed UI/ UX that's designed for a more intuitive build experience.

Made for: Analysts, Data Scientists

Identify opportunities for further investigation with new templates and heat maps for Weather Discrepancy Alerts.

Platform

Guidewire Cloud Platform

Enhance and preserve your testing investments

“Add-your-own” Testing and Quality Gates

Connect your investments by triggering self-managed test suites via a set of exposed Guidewire CI/CD events.

Improve quality with gates through integration of testing results, including blocking build promotion.

Increase transparency and visibility into your own process with a single view across tests, results, and quality.

Made for: Developers, DevOps, Build Managers

The screenshot displays the Guidewire Cloud Console interface. The left sidebar shows the navigation menu with categories like GUIDEWIRE, CONFIGURATION, SECURITY, and DATABASE. The main content area is titled "Quality gates" and shows the configuration for the "ClaimCenter" application. A table lists the quality gates for ClaimCenter, including their IDs, names, stages, and requirements.

Details	ID	Name	Stage	Required	Description	Actions
	cc_acceptance_tests	CC Acceptance Tests	Before promoting: pre-prod	Required	-	[Edit] [Delete]
	minimum_test_coverage	Minimum test coverage	Before merging	Required	This quality gate guards against merging a PR that does not meet a minimum code coverage requirement configured in an external tool.	[Edit] [Delete]
	performance_test_suite	Performance test suite	Before promoting: pre-prod	Optional	This optional gate conveys the status of an additional customer-run performance test suite, allowing withholding the promotion of a build with significant performance degradation.	[Edit] [Delete]
	pre-prod_smoke_test_suite	Pre-prod smoke test suite	Before promoting: prod	Required	This gate guards against promoting a build to prod, when it does not pass a specific set of smoke & sanity test suites run on a customer CI system.	[Edit] [Delete]

Deploy digital experiences more efficiently

Self-service Deployment Capabilities for EnterpriseEngage Apps

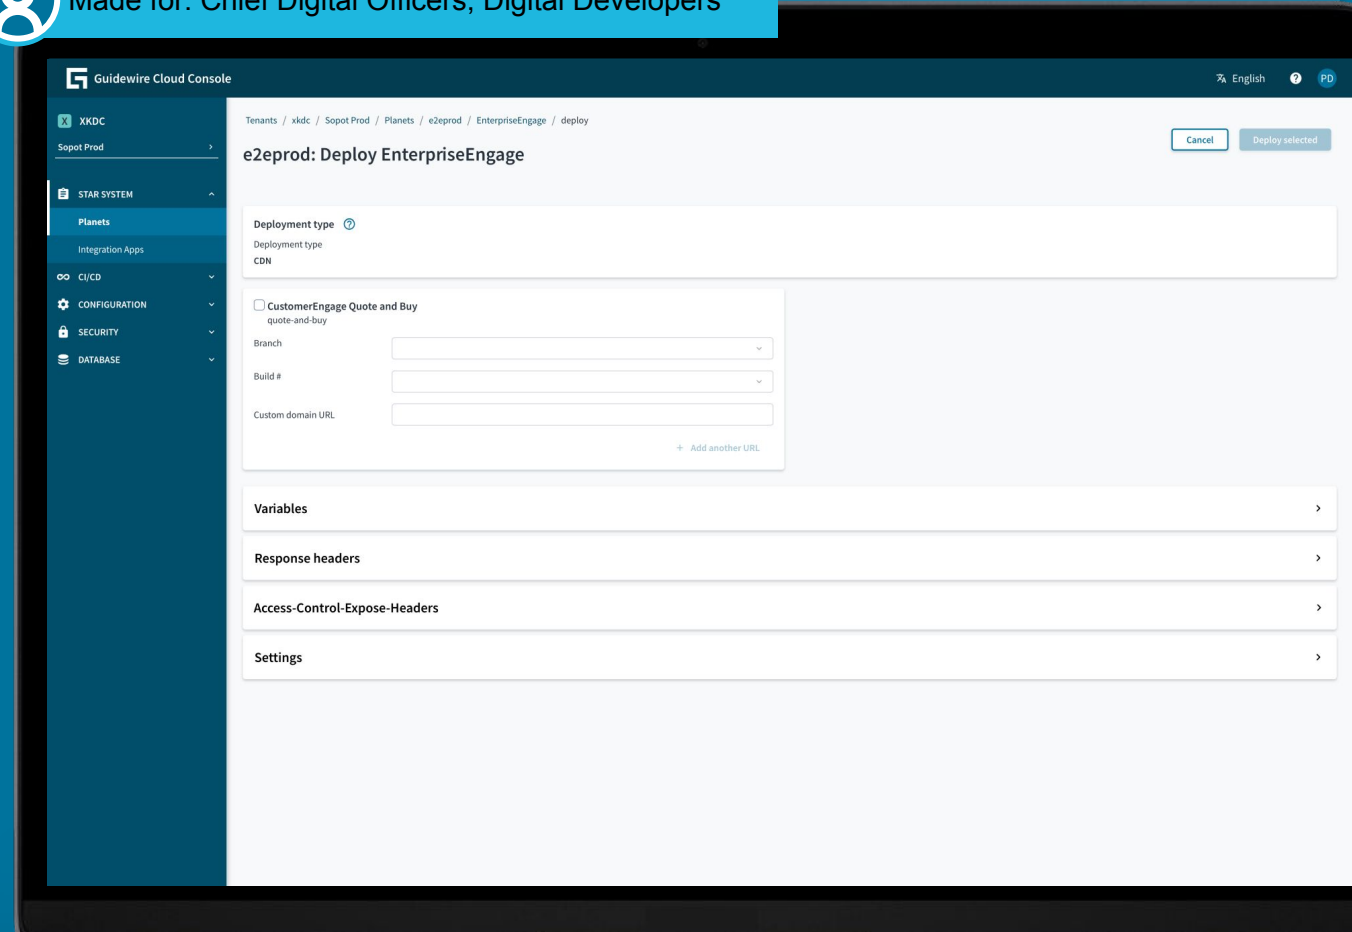

Work at your own pace with the ability to self-promote EnterpriseEngage applications from Non-Production to Pre-Production, and then Pre-Production to Production.

Save time and effort as Guidewire service tickets are no longer required to orchestrate environment promotions and deployments.

Reduce the chance of human error with centralized administration in Guidewire Cloud Console (now also available in Guidewire Home), as TeamCity is no longer required for non-production deployments.

Made for: Chief Digital Officers, Digital Developers

Unify your launch experience

Guidewire Home

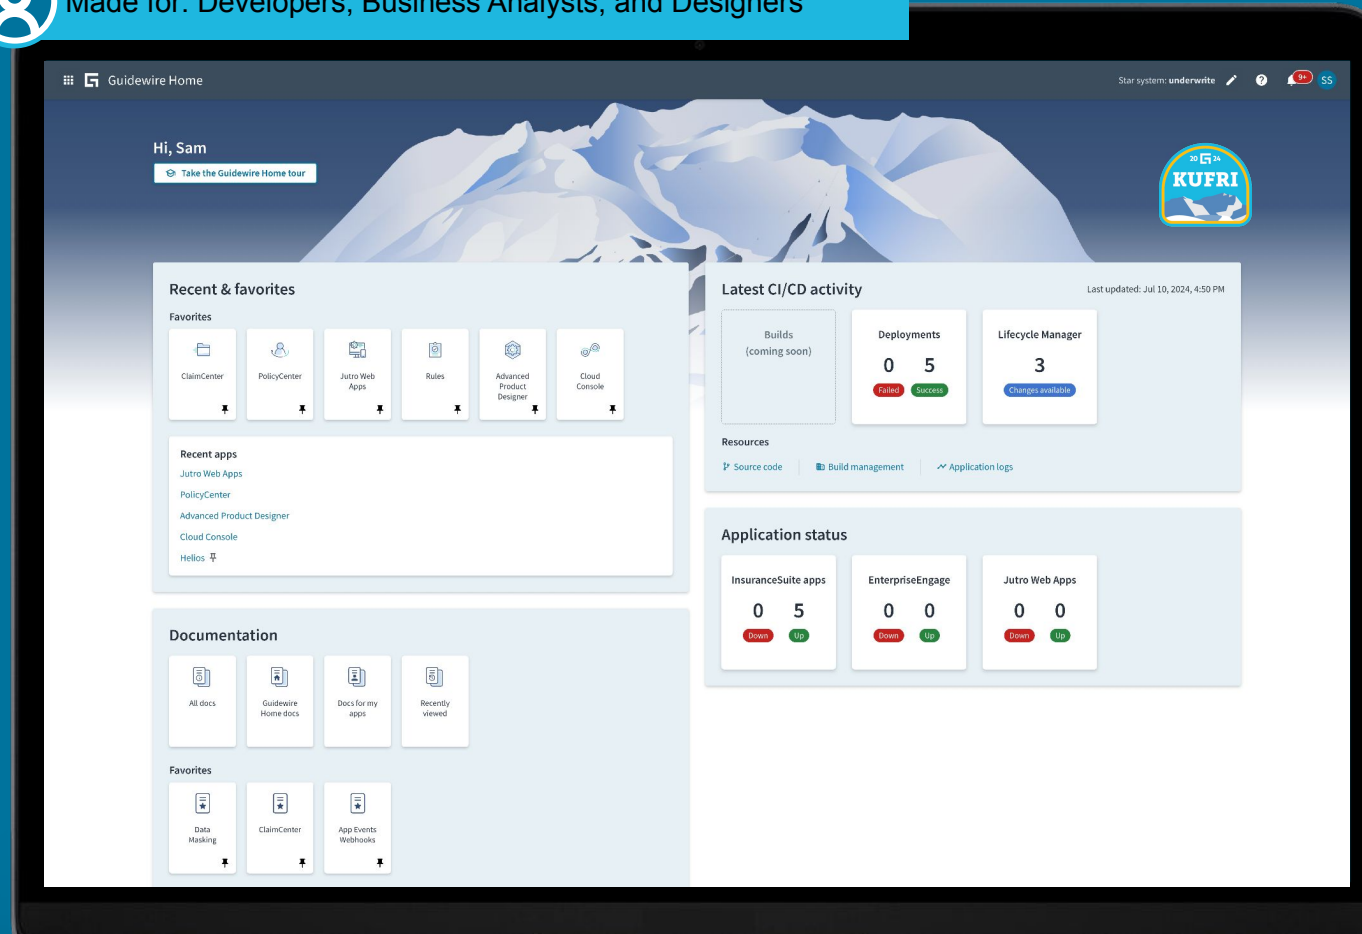

Find what you need quickly with intuitive navigation. All apps are accessible through the new navigation panel and direct links enable the shortest path for users.

Customize your view with working context to specify exactly when and how you want to work.

Efficiently manage your workspace with important information at a glance, such as recent, favorites, documentation, deployment monitoring, app status, and more!

Made for: Developers, Business Analysts, and Designers

Improve update predictability and accelerate cloud updates

Update Preview; DataHub and InfoCenter Fast Updates

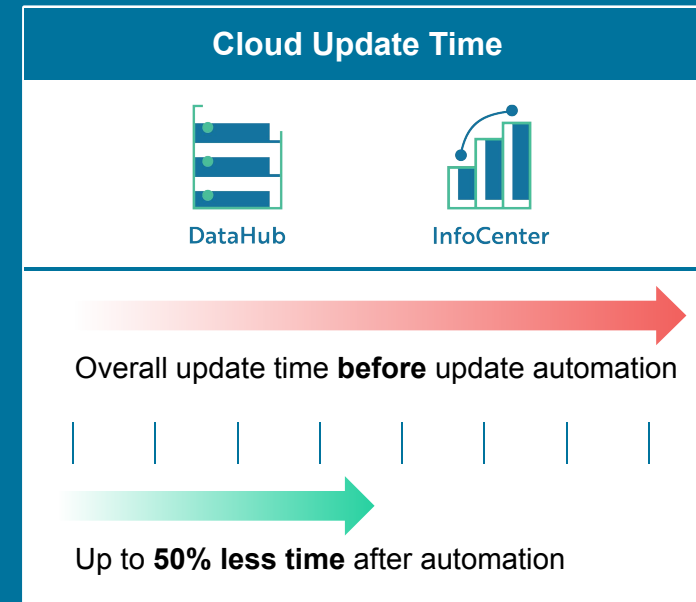

Made for: Release Managers

New Update Preview delivers a preview of an update 3 weeks prior to General Availability, allowing customers to test and evaluate capabilities before widespread deployment. This ensures faster time to value, as customers can embrace new features quickly and maximize the ROI of each update.

Made for: System Admins

DataHub and InfoCenter Fast Updates improve update speed by up to 50% through automated provisioning of infrastructure and inclusion of customer content and configuration. In addition, dev and UAT updates via the new automation process now take about 2 weeks, with zero lead time necessary.

Improve efficiency with modern and flexible business logic

Business Functions

Provide a modern framework for business logic, enabling the development and deployment of individual, reusable, and custom functions via a modern framework for business logic.

Replace code faster and more reliably featuring scalability independent from core applications, rapid updatability, and fine grained security.

Ensure flexibility with support for various languages (JavaScript and TypeScript), and support various use cases including process API, workflow logic, and event-driven outputs.

Made for: Developers and Designers

```

Accelerate product conversion to Advanced Product Designer

Conversion of Existing Non-APD Products to APD

Made for: Developers and Designers

Reduce the cost and effort of conversion specifically for Advanced Product Designer (APD) management of lines of business (LOB).

Enable faster product design and management with APD via mind maps, ruleset development, and enhanced configuration.

Ensure product interoperability with other cloud services via auto generated Cloud APIs that enable cloud services such as Jutro Digital Platform.

The screenshot displays the Advanced Product Designer (APD) interface for configuring a 'Vehicle' product. The interface is divided into several sections:

- Left Navigation Panel:** A tree view showing the product structure under 'Go Commercial Auto'. Items include 'Go Commercial Auto', 'Drive Other Car', 'Trailer Interchange', 'Fire And Fire And Theft Coverages', 'Business Interruption', 'Trailer Interchange', 'Jurisdiction', 'Hired Auto', 'Non Owned Auto', 'Auto Dealer', 'Vehicle', 'Vehicles not owned by applicant' (2), 'Modified vehicle' (3), and 'Driver' (19).
- Header:** 'Advanced Product Designer' with tabs for 'Go Commercial Auto', 'Product Model', 'Editions', and 'Billing'. It includes 'Save' and 'Unlock' buttons and user information: 'Planet: apdtest2 Branch: zrahman'.
- Main Content Area:**
 - Vehicle Info:** A section for 'Vehicle' with 'Add Child Object' and 'Edit Vehicle' options. It includes links for 'About this edition' and 'About Vehicle'.
 - Elements Table:** A table listing 33 coverages. The first 10 rows are shown below:
- Right Panel (Element Details):** A form for configuring the selected element. It includes fields for 'Label' (Vehicle Medical Payments), 'Short Name' (ACAVehMedical), and 'Category' (Vehicle Standard Coverages). It also has buttons for 'Manage Clause Categories', 'Schedule Coverage', and 'Edit Sub-clauses'. Below this are sections for 'Tags', 'Clause Terms', 'Claims Information', 'Blanket Information', and 'Additional Properties'.

Label	Category	Clause Availability	Short Name	Actions

Guidewire Data Platform

Empower data access, curation, and insight

Guidewire Data Platform is the only insurance data platform optimized for P&C

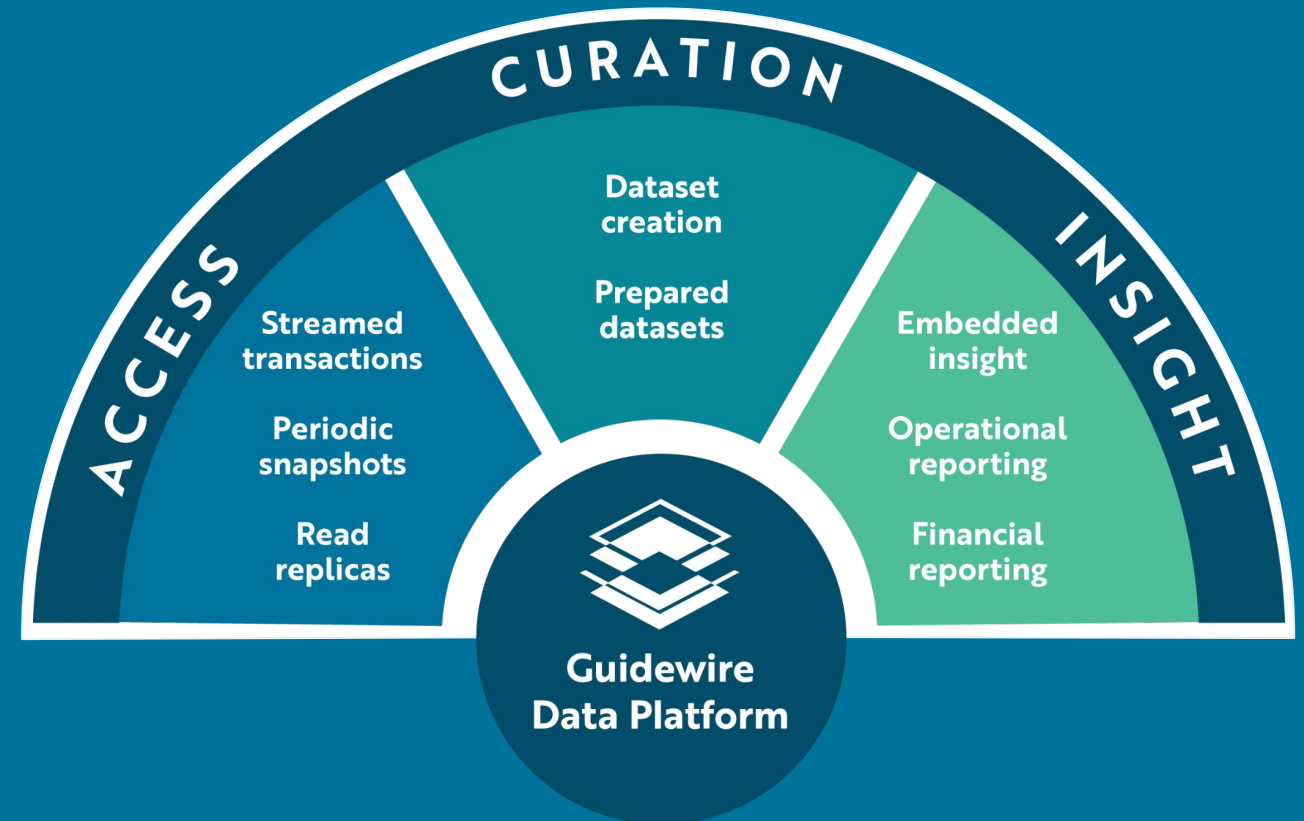

Made for: CIOs, CTOs, Chief Data Officers, Data Architects, Chief Actuary

Access a complete view of your InsuranceSuite data that is optimized for P&C insurers through a purpose-built data model and repository for Guidewire core data.

Enrich and curate data to be insights-ready to power analytics applications with pre-curated, business-ready datasets and curation tools.

Guide accurate business insights that improve underwriting, risk analysis, and claims performance with visualizations and dashboards.

Improve integrity, efficiency, and observability of data pipelines

New CDA Features

Made for: Business Analysts and Data Scientists

CDA Data Integrity Service (DIS) ensures delivery for CDA of InsuranceSuite data into its AWS Simple Storage Service (S3) buckets and provides confidence in the integrity of data available for customers.

Made for: System and Platform Admins

```

  "maxDbToS3LatencyInMs": <time_to_transfer_latest_batch>,
  "bytesRead": <num_bytes_read_in_latest_batch>
}

```

CDA Lifecycle Events & Operational Metrics streamlines and automates data consumption in data pipelines, and establishes visibility into CDA operations for authorized users with key performance metrics of latest batch write time, latency, and batch throughput.

Jutro Digital Platform

Kickstart development with Jutro digital experience templates

Agent and Policyholder Starter Templates

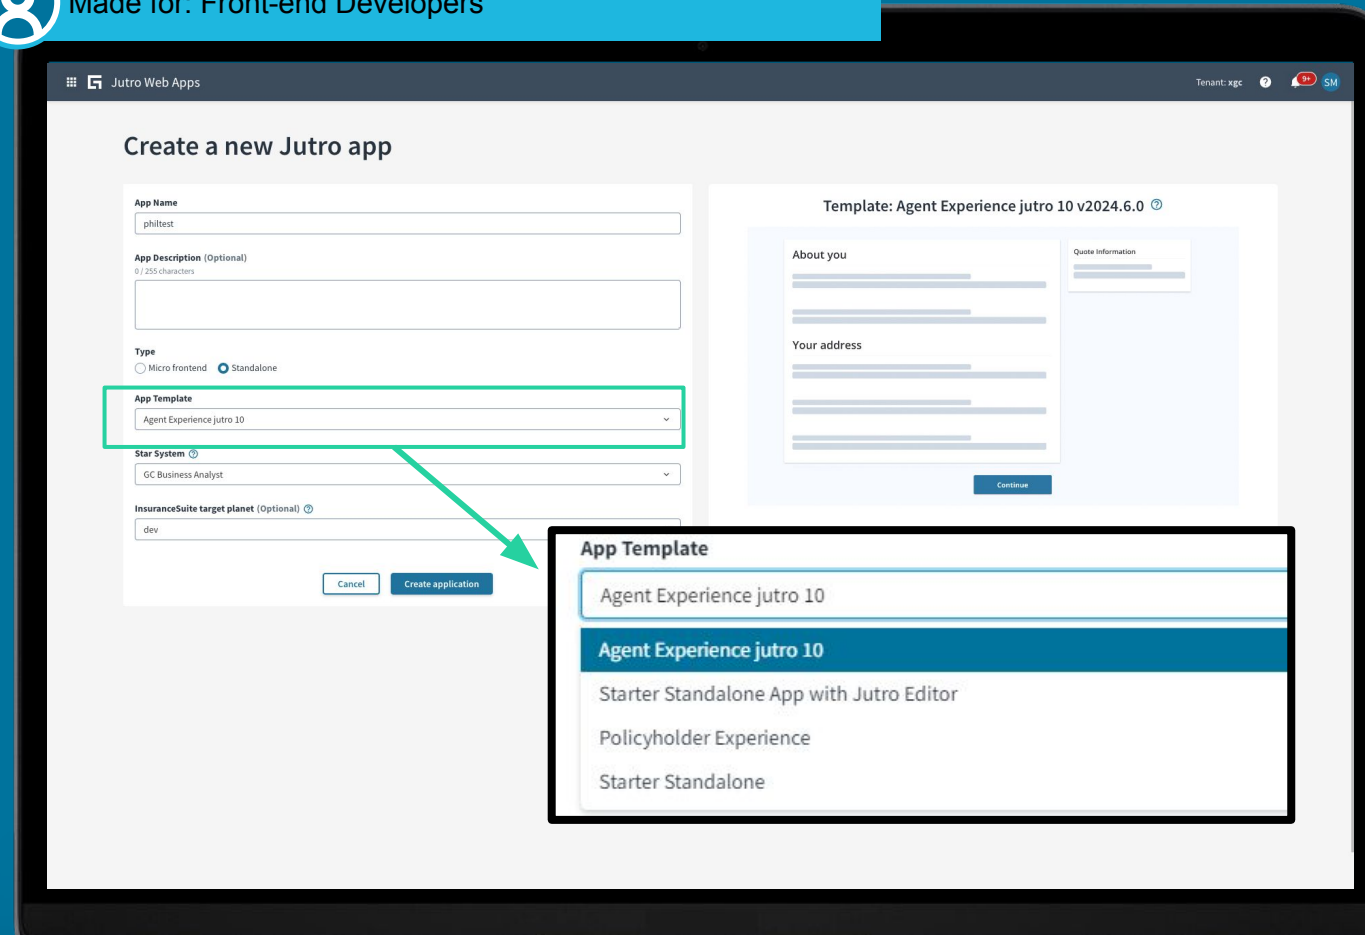

Provision fully functioning web applications in minutes with three new starter templates: Agent Experience; Personal Auto Quote & Buy for Agents; and Policyholder Experience.

Create first-class digital experiences with access to source code and build management so you can implement additional customizations unique to your business.

Ensure quality and consistency with templates that adhere to architectural best practices and provide business patterns, custom APIs, and mobile-responsive designs.

Made for: Front-end Developers

Build digital experiences faster while optimizing costs

Enhancements for Reusing Digital Assets

Made for: Front-end Developers

Bring your own UI libraries

Integrate Jutro Digital Platform with private node package manager (NPM) repositories that contain your existing components and functions, such as custom design systems.

Reuse custom functionality

Create custom packages of new components and functions that can be published to Guidewire's NPM repository and easily imported into Jutro web applications.

Share contexts in micro frontends

Build Jutro web applications and use Module Federation to share contexts and libraries across embedded UIs and shell apps, while keeping micro frontend deployment and development independent.
